

Rating Action: Moody's Ratings changes Frontier Clearing Corporation B.V.'s outlook to positive from stable and affirms its rating

21 April 2026

Frankfurt am Main, April 21, 2026 – Moody's Ratings (Moody's) has affirmed the Baa1 Insurance Financial Strength Rating (IFSR) of Frontier Clearing Corporation B.V. (Frontclear) and changed the outlook to positive from stable.

RATINGS RATIONALE

OUTLOOK CHANGED TO POSITIVE FROM STABLE

The positive outlook reflects our expectation that Frontclear will continue to expand its business and underlying earnings base as well as making tangible progress with planned changes to its capital structure. It also reflects our view that Frontclear has built a strong track record in scaling its business while ensuring adequate governance and risk management along the way. After several years of muted business growth, Frontclear recorded very strong growth in 2024 and 2025, increasing gross notional exposure from \$331 million in 2023 to \$491 million in 2024 and \$691 million in 2025. Over time, Frontclear has demonstrated its ability to adapt to changes in the market environment by developing new products and by shifting its geographic focus when needed. Despite recording its first-ever transaction loss in 2025, we believe the company continues to adhere to a conservative underwriting approach.

Frontclear's capital base currently comprises mainly debt-based instruments provided by development finance institutions, which lack the permanence of traditional equity capital. We understand management is in advanced discussions with its supporters to transition to a permanent capital base, simplify the capital structure, and attract new investors (likely including private-sector investors). This initiative would require significant changes to the company's legal set-up and could result in new regulatory requirements. If implemented successfully, we believe Frontclear would benefit not only from higher capital levels but also from improved capital quality.

We also believe that attracting private-sector investors will require Frontclear to articulate a clear path to stronger profitability than it currently generates.

AFFIRMATION OF IFSR

The affirmation of Frontclear's IFSR at Baa1 reflects its unique market position; strong capitalization, supported by modest guaranteed portfolio leverage and low investment risk; its demonstrated track record of delivering on its mandate; and the investment and technical support it receives from several large European development finance institutions.

These strengths are offset by Frontclear's still modest size, limited risk diversification, exposure to counterparties in non-investment-grade countries (including elevated wrong-way risk), and modest profitability.

FACTORS THAT COULD LEAD TO AN UPGRADE OR DOWNGRADE OF THE RATING

The rating could be upgraded if Frontclear (1) successfully implements the planned changes to its capital structure and attracts additional funding (a prerequisite for further business expansion), (2)

continues on its growth trajectory while upholding strong underwriting standards and preserving healthy capital metrics, and (3) maintains strong risk management practices and governance while improving underlying profitability.

Given the positive outlook, there is limited downward pressure on the rating. However, the outlook could revert to stable if Frontclear (1) fails to improve capital quality or attract additional funding, (2) fails to demonstrate its ability to fulfil its development mandate (for example, through a contraction in business volume), or (3) materially increases capital and liquidity risk-taking relative to its funding base, including due to a weakening in portfolio quality.

The principal methodology used in this rating was Financial Guarantors published in March 2024 and available at <https://ratings.moodys.com/rmc-documents/416491>. Alternatively, please see the Rating Methodologies page on <https://ratings.moodys.com> for a copy of this methodology.

Frontclear's "Standalone Scorecard-indicated Outcome" is Baa1, two notches below the "Preliminary Standalone Outcome" of A2. This difference mainly reflects the size and characteristics of Frontclear's portfolio compared with other insurers rated under the Financial Guarantors methodology, as well as Frontclear's exposure to developing and frontier markets, which is not captured by the operating environment assessment in the scorecard.
